BGOV200

Federal Industry Leaders 2019

Turn Opportunities Into Action.

Bloomberg Government is proud to present our ninth annual BGOV200 Federal Industry Leader rankings. Our rankings reveal the top federal contractors based on fiscal 2019 data for prime, unclassified contracts awarded across all government agencies in the United States.

Consistent with recent years, most of the market-moving companies in fiscal 2019 relied on spending in certain categories. Some of the largest increases year over year are for markets such as research and development, which increased by \$8.8 billion; facilities and construction, which grew by \$6.6 billion; and supplies and equipment, which rose by \$5.2 billion.

Fiscal 2019 contracting dollars increased by \$36 billion compared with the previous year. That's good news for contractors. Congress passed two regular fiscal 2020 spending bills that totaled \$1.4 trillion in discretionary spending, both signed into law Dec. 20, 2019. The bills eclipsed a continuing resolution, or stop-gap spending, established at the previous year levels to fund government activities for October through December. These federal spending trends have more of an impact on future BGOV200 results for some companies, but significantly change the landscape for contract obligations.

We are proud to see many of our clients and partners on this distinguished list.

Whether your focus is on sales, strategy, or business development, Bloomberg Government provides contractors with data-driven decision tools, news, and analytics that help shape strategy, execution, and pipeline. We make it easier to understand the market and competitive landscape and find partners. Most importantly, we help government contractors build bigger pipelines, make smarter business development investments, and win more federal contracts.

We hope you enjoy the ninth annual BGOV200 report. To learn more about our government contracting solution, visit about.bgov.com/government-contracting.

Sincerely,

Donald Thomas

FY19 Key Contracting Trends and Market Driving Forces

By: Daniel Snyder, Director of Government Contracts Analysis, Bloomberg Government

Federal government spending reached a new high in fiscal 2019 – \$597 billion. Both large and small companies capitalized on the fourth straight year of federal contract spending growth, up from \$442 billion in fiscal 2015.

The ninth annual BGOV200 Federal Industry Leaders Study ranks the top 200 vendors by value of prime, unclassified contracts awarded by U.S. agencies in fiscal 2019. It analyzes the top contracts at 92 agencies and departments, and in 20 purchasing categories.

This year's BGOV200 report focuses on companies and broad trends in the market, and explores the contract dynamics of the past year and the performance of successful contractors. The study finds:

Fiscal 2019 total federal contract spending increased by 6%, from \$561 billion in fiscal 2018.

The share of total government obligations won by the top 200 contractors was 64%, the same as in fiscal 2018.

120 companies improved their rankings, up from 116 in fiscal 2018; 69 companies lost ground in the rankings – the same amount as the previous year.

The rankings of 11 companies, including 5 of the top 10, remained unchanged; 37 companies were new entrants to the BGOV200.

Budget Changes

Fiscal 2019 contracting dollars increased by \$36 billion compared with the previous year. That's good news for contractors.

Congress passed two regular fiscal 2020 spending bills that totaled \$1.4 trillion in discretionary spending, both signed into law Dec. 20, 2019. The bills eclipsed a continuing resolution, or stop-gap spending, established at the previous year levels to fund government activities for October through December.

The total fiscal 2020 appropriations action met the terms of the two-year budget caps deal reached in August 2019. The pre-supplemental fiscal 2020 appropriations for defense activities across the government – base, war funding, and emergency funding – increased 5% compared with 2019, and increased by about 2% for nondefense activities.

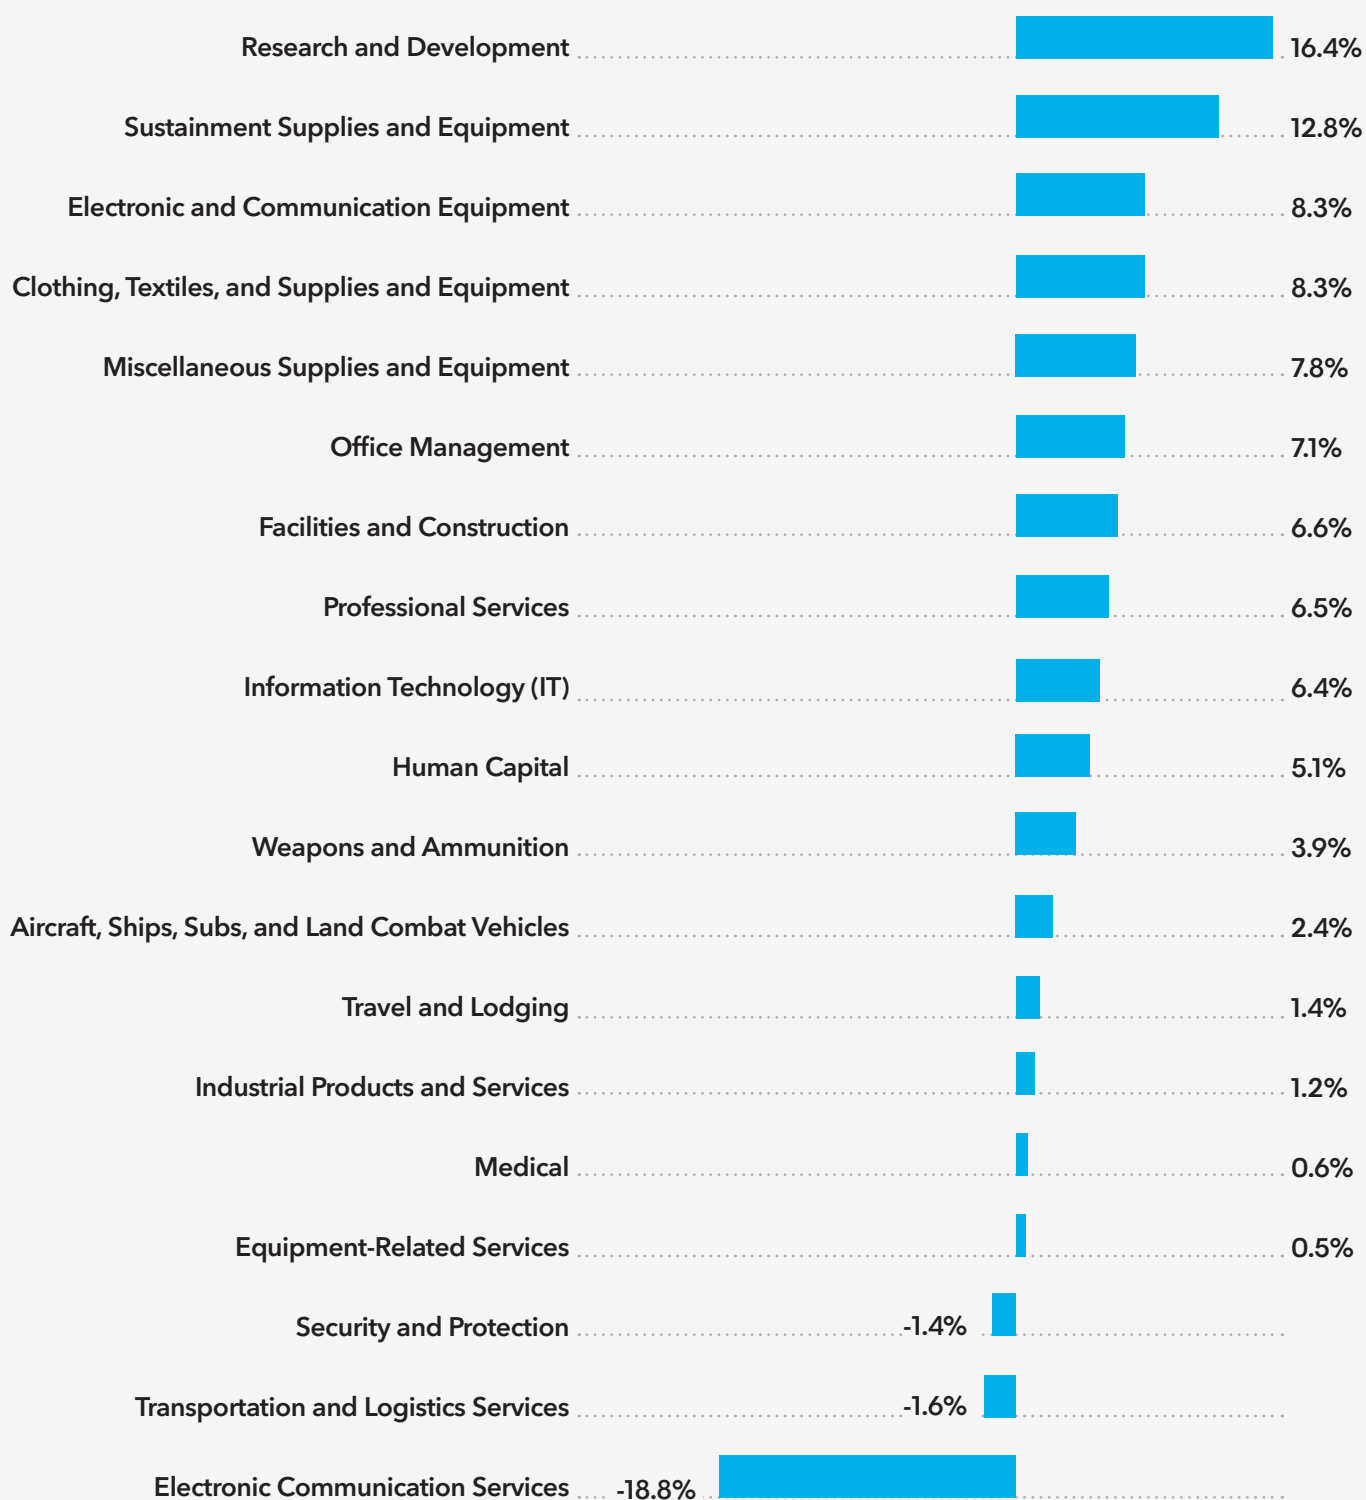

Since the two regular fiscal 2020 appropriations bills were passed, there have been four coronavirus packages enacted that include an additional \$467 million in emergency discretionary spending plus billions in mandatory funds. The impact of these bills on the contracting community will be complex, and more funding is likely before the end of the year.

Market Movers

Percentage increase and decrease between fiscal 2018 and 2019

The majority of purchasing categories highlighted in the BGOV200 saw an uptick in fiscal 2019 spending. Of the 19 categories analyzed, 16 increased and 3 experienced decline. Some of the largest increases year over year are for markets such as research and development, which increased by \$8.8 billion; facilities and construction, which grew by \$6.6 billion; and supplies and equipment, which rose by \$5.2 billion.

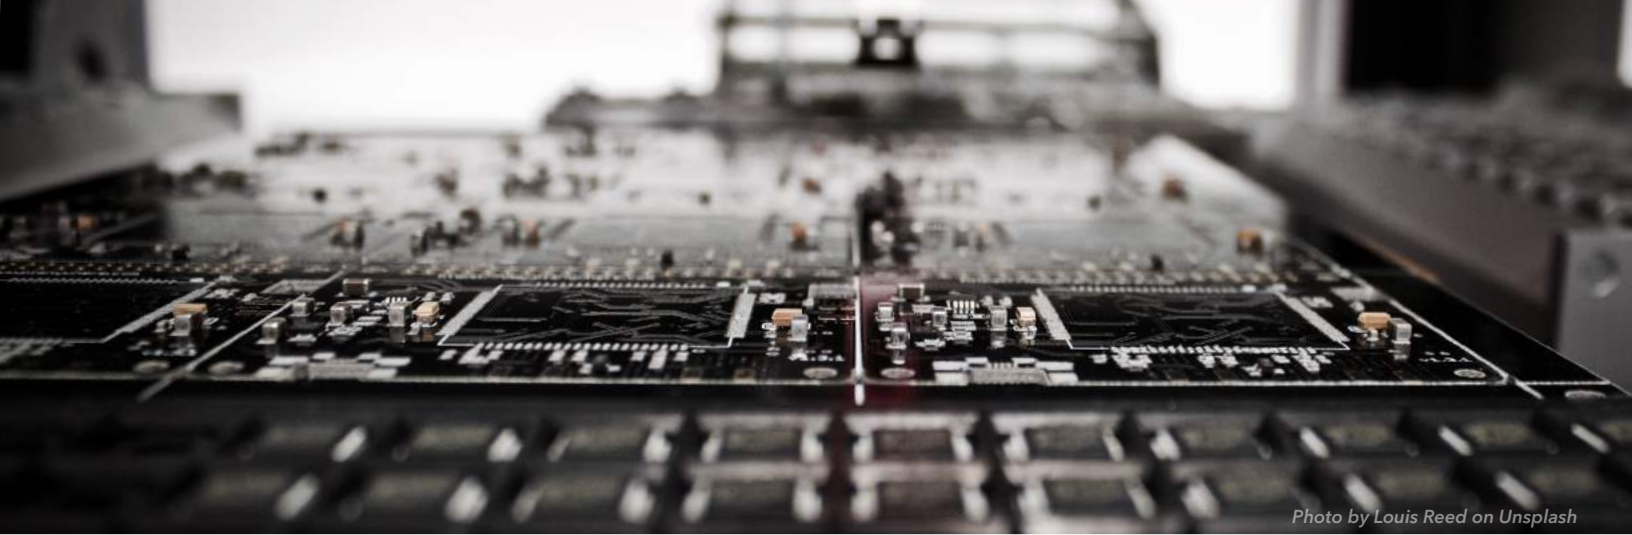

Photo by Louis Reed on Unsplash

“This is the sixth straight year that federal technology markets have experienced growth.”

Information Technology

Technology continued to be a massive contributor to market growth. It grew by \$4.4 billion between fiscal 2018 and 2019 and now stands at nearly \$70 billion. In fiscal 2019, tech services drove the growth and expanded by \$3.3 billion, to \$48.2 billion, as agencies continued investing in modernization efforts to replace legacy systems. Hardware purchases had an \$800 million uptick, to \$21.4 billion, as agencies updated equipment.

This is the sixth straight year that federal technology markets have experienced growth. Spending was nearly \$70 billion in fiscal 2019, up from \$50 billion in fiscal 2014. Annual increases throughout the six-year period have averaged \$3.3 billion.

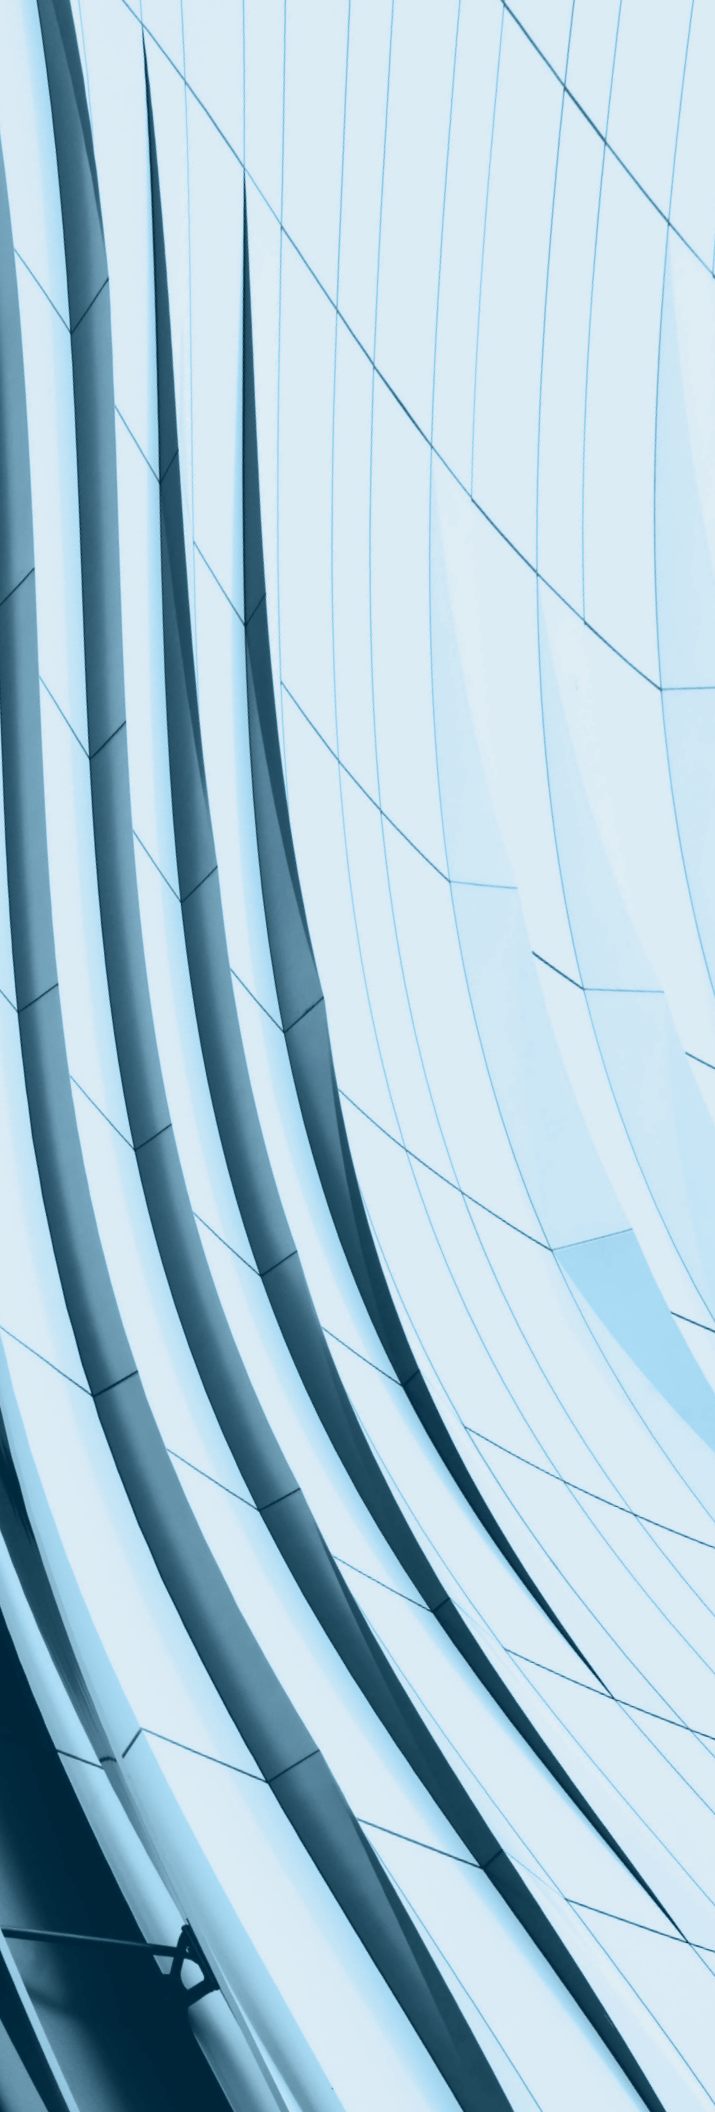

General Dynamics (\$4.1 billion), Leidos Holdings Inc. (\$3.2 billion), and Raytheon (\$2.3 billion) were the top performers in the IT services sector. These companies maintained their dominance by relying on major single-award contracts in combination with a broad portfolio of multiple-award contracts.

General Dynamics generated most of its IT obligations through a single-award contract, Common Hardware Systems 5, that delivers tactical IT to the Pentagon. Leidos attributes most of its IT obligations to two single-award contracts: managing Pentagon health records through the Defense Health Management System Modernization and the Defense Information Systems Agency contract for the Global Information Grid. Raytheon relied heavily on its Army contract for Multifunctional Information Distribution System (MIDS) Joint Tactical Radio Systems (JTRS) terminals.

Small businesses accounted for \$24.3 billion of the overall \$70 billion in fiscal 2019 IT spending. The top small businesses include FCN Inc. (\$467 million), ThunderCat Technology LLC (\$360 million), and Red River Technology LLC (\$352 million).

Professional Services

The professional services market, which covers the most expansive categories of spending such as engineering, marketing, management consulting, and other areas, has grown by about \$5.4 billion from fiscal 2018 to 2019 and now totals \$84.2 billion.

In fiscal 2019, that growth was most beneficial to companies such as General Dynamics (\$2.7 billion in obligations), Booz Allen Hamilton Holding Corp. (\$2.6 billion), and Boeing Co. (\$2.4 billion), which are among the vendors that generated the most obligations.

General Dynamics maintained dominance in the professional services market through work on a single-award contract providing contact center operations to Health and Human Services. Booz Allen won the majority of their work through multiple-award contracts such as the General Services Administration's One Acquisition Solution for Integrated Services (OASIS) and the Navy's SeaPort-e. The majority of Boeing's work was performed through sustainment of the Air Force's C-17 aircraft.

Small business accounted for \$27.6 billion of the \$84 billion spent on professional services in fiscal 2019. The top small businesses include Arctic Slope Regional Corp. (\$462 million), T-Rex Solutions LLC (\$402 million), and Torch Technologies (\$371 million).

Agency Spending Trends

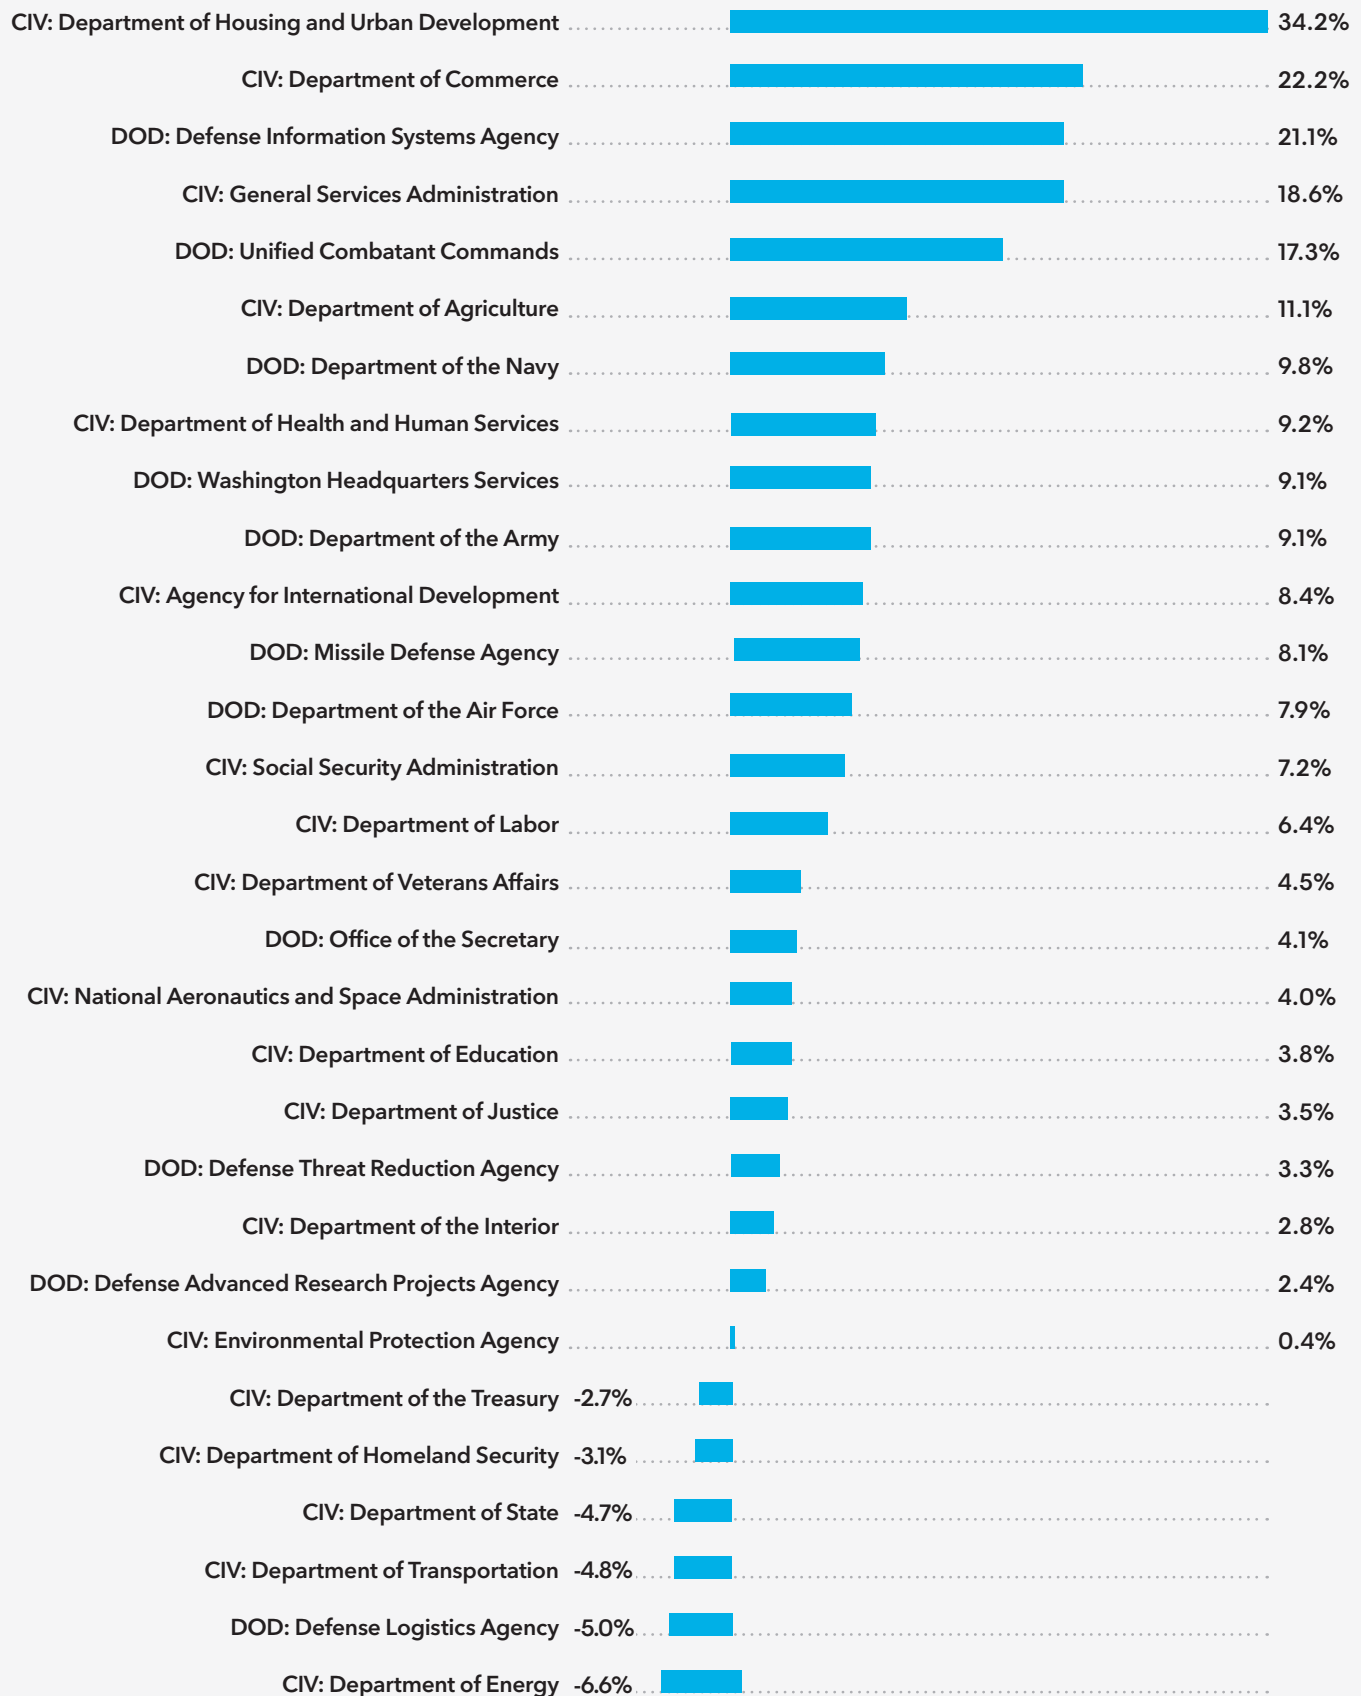

Defense contract spending was \$404 billion in fiscal 2019, a \$30 billion increase from the prior year. In total, spending at the Pentagon surged by \$122 billion between fiscal 2015 and 2019.

In fiscal 2019, DOD's largest bureaus experienced spending increases of about 10%. The Navy added \$12.4 billion and accounts for \$127.4 billion. The Army increased by \$9.7 billion and totaled \$106.7 billion. The Air Force gained \$6.6 billion and totaled \$83.7 billion.

Civilian agencies account for the remaining \$193 billion of the \$597 billion in fiscal 2019 contract obligations. The biggest winners on the civilian side were those related to health care. Health and Human Services increased by \$2.4 billion and totals \$26.5 billion. The Department of Veterans Affairs saw an uptick of \$1.3 billion and ended the year with a total of \$28.6 billion in fiscal 2019.

A portion of the biggest-spending agencies, including the departments of Energy (\$1.9 billion), Homeland Security (\$578 million), and State (\$447 million), decreased their spending obligations year over year. The only major setback on the Defense side was a decrease at the Defense Logistics Agency (\$1.8 billion).

Percentage increase and decrease between fiscal 2018 and 2019

CIV: Civilian Agency DOD: Defense Agency

Mergers and Acquisitions

Mergers and acquisitions remained robust in the federal marketplace, but activity slowed slightly in fiscal 2019.

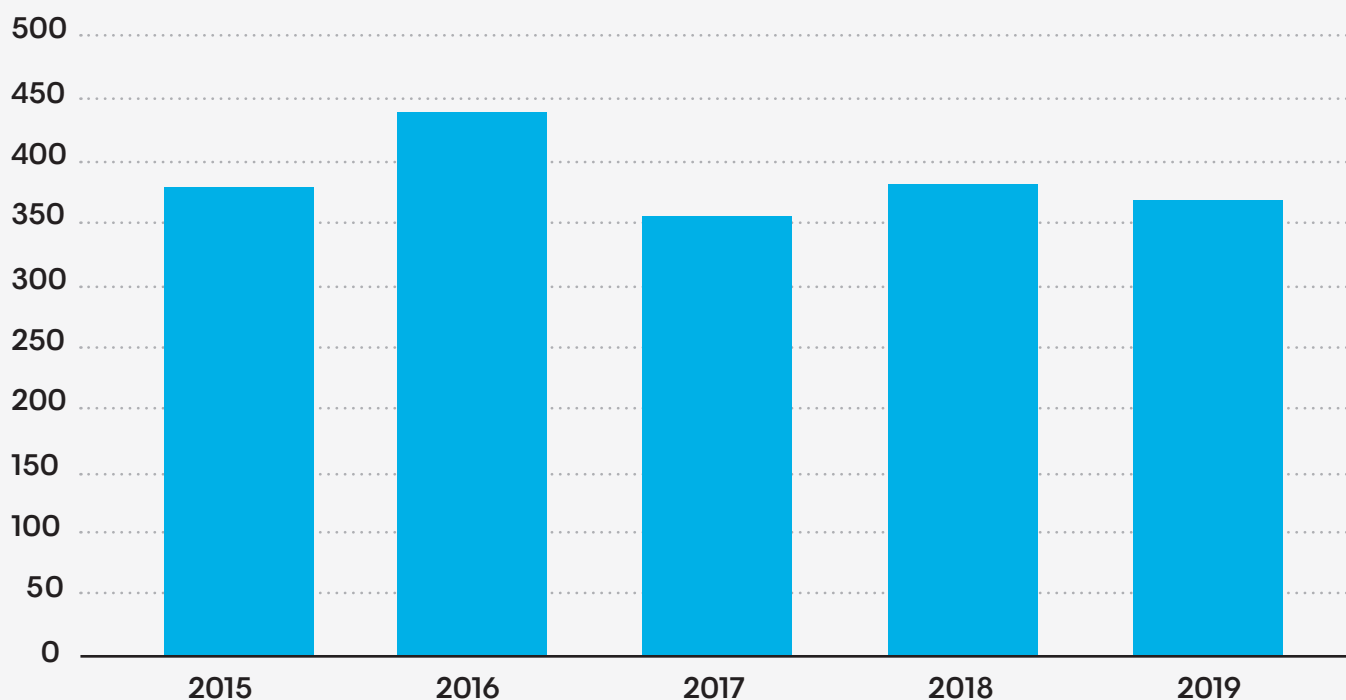

Intensifying competition for federal IT services and companies aiming to add specialized professional services to their portfolio of offerings to the federal government remain significant contributors to many major mergers, acquisitions, and divestitures.

Bloomberg Government identified 370 transactions in the federal space in 2019 through our M&A Dashboard, compared with 381 deals that were completed in 2018. Target companies were acquired for their government work as many contractors looked to buy access to customers through acquisitions instead of growing organically.

The BGOV200 rankings cover all deals that closed by Sept. 30. BGOV's merger and acquisition activities are derived from the list of companies in the BGOV200. Companies outside the BGOV200 are not listed in the findings.

"Mergers and acquisitions remained robust in the federal marketplace, but activity slowed slightly in fiscal 2019."

Number of mergers and acquisitions

Contracting Trends Affecting Government Spending

Best-in-Class Contracts: In last year's BGOV200, Bloomberg Government emphasized the impact on consolidating spending on major multiple-award contracts. This trend accelerated in fiscal 2019 and is likely to continue. The government's strategic approach to improving the federal acquisition system by funneling spending obligations through contracts designated as best-in-class, or BIC, continues to gain momentum. The number of BIC contract programs is nearly 40 in fiscal 2019 and accounts for at least \$43 billion in spending.

Other Transaction Authority: While multiple-award contracting is expected to continue to dominate spending for years to come, agency bias toward new acquisition methods for buying goods and services also gained momentum. The government's use of "other transaction authority," or OTA, grew to nearly \$8 billion in fiscal 2019, from \$4.4 billion in fiscal 2018. Agency usage is likely to continue heavily in fiscal 2020 and beyond as agencies seek rapid access to emerging technologies through OTA projects that are intended for basic, applied, and advanced research projects.

Cybersecurity Policy Changes: Cybersecurity spending obligations increased to \$7.8 billion in fiscal 2019 from \$6.4 billion in fiscal 2018, as agencies invest in boosting their cyber hygiene to protect against malicious activity. Cybersecurity is likely to play an increased role outside the cyber contracting market, with changes underway at the Pentagon that are aimed at securing the defense supply chain. Starting in fiscal 2020, the Defense Department will become the first agency to require a mandatory cybersecurity certification. The program, known as the Cybersecurity Maturity Model Certification (CMMC), will affect about 300,000 companies in the DOD supply chain by 2026, when the requirements will be in place for all applicable contracts.

What's Ahead

The president's fiscal 2021 budget request for base discretionary funding of \$1.3 trillion (including base, OCO, and emergency funds) suggests that federal spending levels are on pace to increase in the future.

The \$1.3 trillion requested by the president includes \$590 billion for nondefense discretionary programs and \$671.5 billion in base defense funding. As of May 2020, top House appropriators have received preliminary top-line spending figures for their fiscal 2021 bills and are remotely drafting legislation to fund the government past Sept. 30, even as the coronavirus complicates their work. Appropriators plan to hold markups once they return to Washington.

The Trump administration has requested \$92.2 billion for unclassified information technology in fiscal 2021. The IT funding would direct \$53.4 billion to civilian agencies and \$38.8 billion for defense agencies. Many of those investments are intended to continue modernizing outdated legacy systems to make the government run more efficiently. About \$20 billion of the IT funds would be flagged for improving the country's cybersecurity posture. The amount of classified IT spending is not reported, but BGOV estimates that it would probably add about \$11 billion, which would bring the total IT budget request to over \$103 billion.

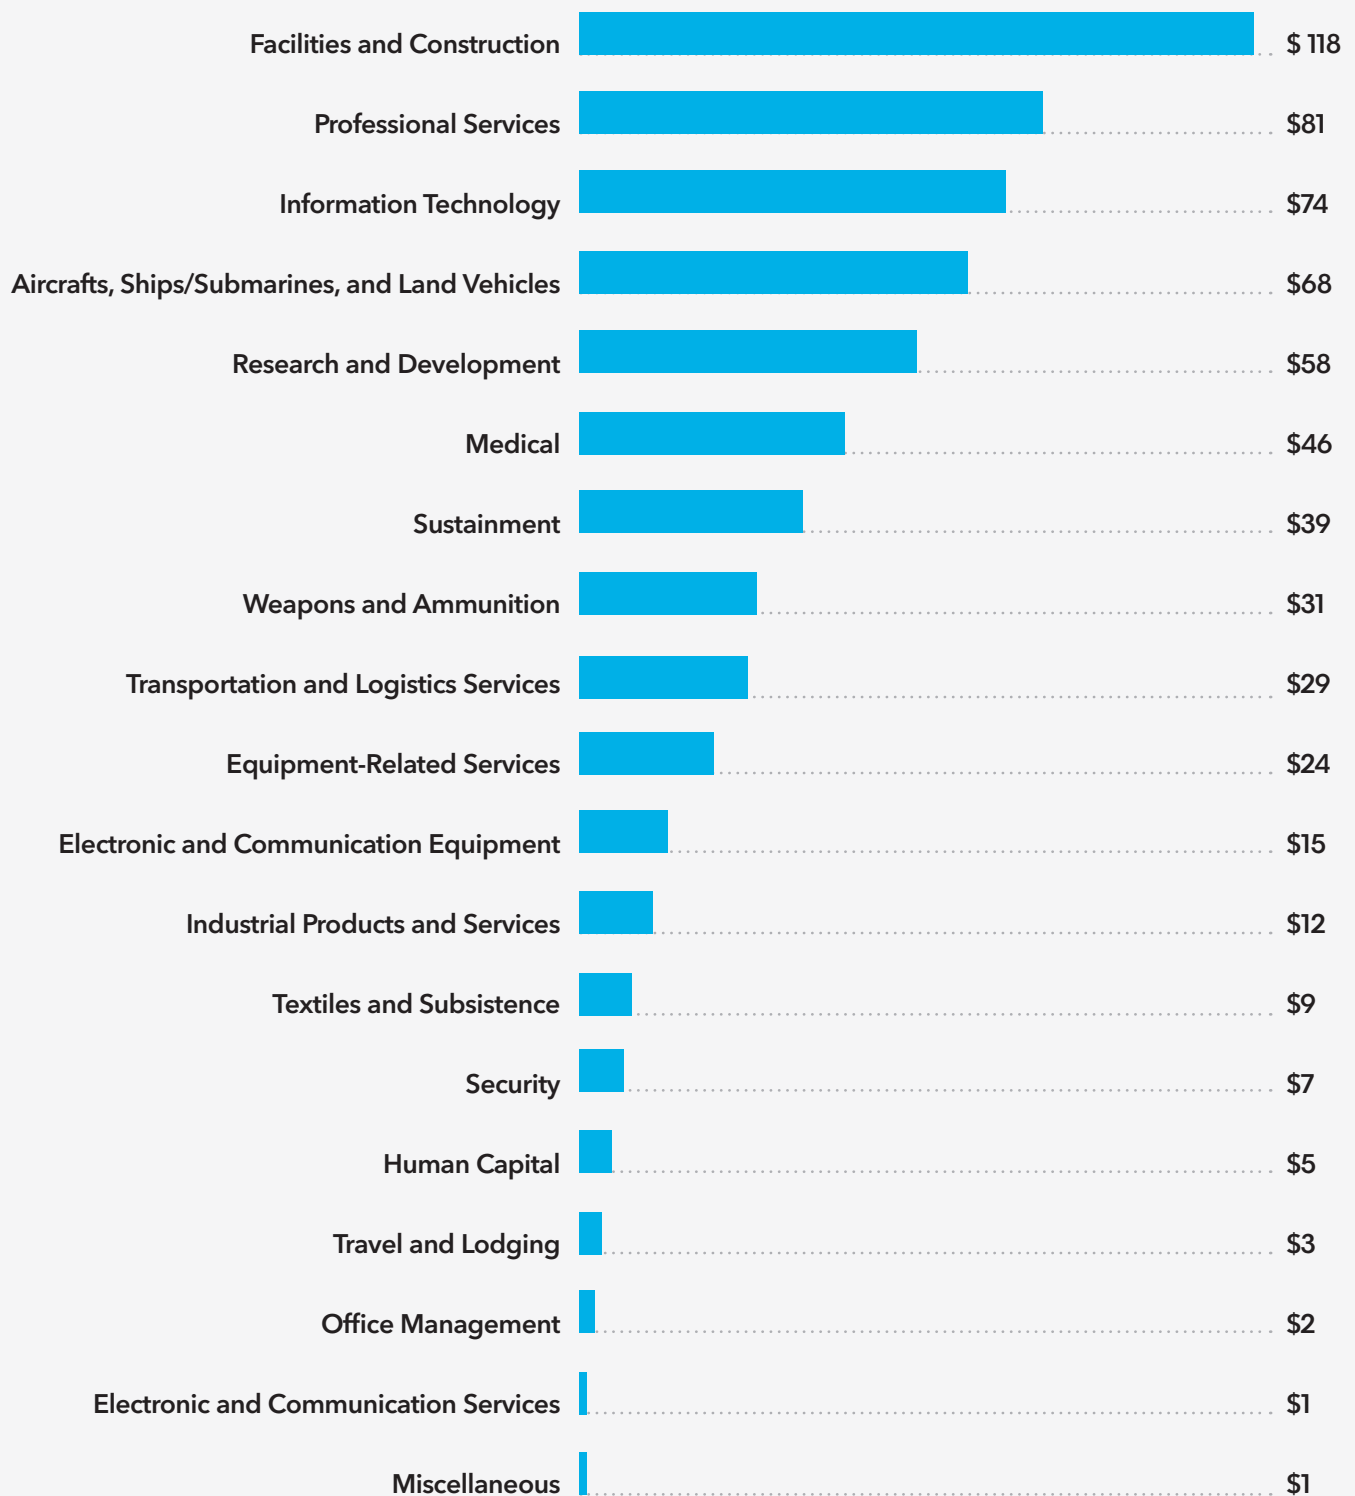

The funding patterns at each agency vary in fiscal 2021. The Defense, Veterans Affairs, Homeland Security, and Treasury departments, as well as NASA, are among the few agencies that would receive budget increases in President Donald Trump's budget plan. Reductions are proposed for many others. Major cuts are planned at the Commerce Department, while cuts that were planned at Health and Human Services will revert to surplus as the agency continues to lead the effort fighting the coronavirus pandemic.

Bloomberg Government forecasts fiscal 2020 spending obligations could top \$600 billion, once spending ends for the year in September 2020; this would be a record high. The top markets that are likely to see continued growth in fiscal 2020 based on BGOV forecasts are facilities and construction (\$118 billion), professional services (\$81 billion), and information technology (\$74 billion).

Methodology

2019 BGOV200 Methodology and Notes

The BGOV200 Federal Industry Leaders 2019 study ranks contractors by the value of their prime, unclassified government contract obligations in fiscal 2019. The information in this study is drawn from Bloomberg Government's proprietary federal procurement database. Our rankings cover classified work in fiscal 2019 at the 92 agencies and departments that report their contracts obligations to the Federal Procurement Data System - Next Generation (FPDS-NG), the government source from which BGOV derives its data.

Rankings are also provided for each of the 19 top-level category management areas as defined by the General Services Administration's taxonomy.

This study covers only prime contracts - those in which companies have direct relationships with the government - and not subcontracts. The spending totals for the Defense Department comprise contracts at the Army, Air Force, Navy, and 20 other defense agencies. Spending at each of those components is also reflected in the Defense Department totals.

We also rank all nondefense cabinet departments and the four independent agencies that spent the most on procurement: the Environmental Protection Agency, the General Services Administration (GSA), the National Aeronautics and Space Administration, and the U.S. Agency for International Development. Rankings are for contracting agencies, rather than funding agencies. Nearly half of the contracts issued by the GSA and more than a quarter of those issued by the Interior Department are funded by other agencies. GSA and Interior provide contracting services to those agencies for a fee.

Joint ventures are listed separately from their parent companies when they don't have a single majority parent

company. For example, United Launch Alliance, LLC is a 50-50 joint venture of Lockheed Martin Corp. and Boeing Co. United Launch Alliance is listed as a separate company (No. 40). Joint ventures for which one parent company owns 51% or more are rolled up to the majority parent company.

Data are accurate as of May 2020. Federal procurement officials can retroactively update the government's contract data system for up to five years. Contract awards, or obligations, reported by the government for fiscal 2019 don't match contract revenue reported by companies to the Securities and Exchange Commission. This is because companies generally don't record contract awards as revenue until they are paid for their services and because corporate fiscal years often don't align with the federal fiscal year. Differences in how companies report revenue from subcontracts and joint ventures also affect the totals. Rankings are based on net contract obligations. Federal procurement officials report the funds they obligate, or reserve, when contracts are signed. Agencies pay contractors when they present bills for products and services.

Agencies sometimes de-obligate unspent funds, which are recorded as negative dollar amounts. The contract totals in this analysis are the net sum of obligations and de-obligations recorded for fiscal 2019. De-obligations recorded in fiscal 2019 can result in total spending that is lower than subordinate agency or category spending.

Rankings are based on federal unclassified spending obligations as reported to FPDS. Spending for state and local, intelligence agencies, and subcontracts spending data is not reported. Company assignments are based on mergers and acquisitions that have closed as of Sept. 30, 2019.

Prior year rankings and dollar totals referred to in this analysis are for fiscal 2018. Dollar amounts and their assignment to agencies and product/service categories are as reported in the FPDS-NG. Inconsistencies in FPDS-NG reporting can occur.

About Bloomberg Government

Bloomberg Government provides data-driven decision tools, news, and analytics that help shape business strategy, execution, and pipeline. We make it easier to understand the federal market and competitive landscape.
